# Exam Practice Run

Use `data.xlsx`.

The workbook contains data on bike-share rides. Each row is one ride.

## Question

1. Import `data.xlsx`.
2. Find the mean of `duration_min`.
3. Find the mean of `distance_km`.
4. Find the mean of `duration_min` for rides with `weekend == "yes"`.
5. Write one short sentence: is the average ride duration higher on weekends than on weekdays?

## Reminder

Your final PDF should:

- include the code you used to get the answer
- show your written answer
- include your exam number
